

# Introduction to Radiation Detectors and Electronics

Helmuth Spieler

Lecture Notes – Physics 198, Spring Semester 1998 – UC Berkeley

## Table of Contents

Preface (Preface.pdf, 8K)

I. Introduction (I-1-Intro.PDF, 10KB)

1. Why?
2. Some Applications
  - a. Faint-Light Imaging in Astronomy  
(I-2-a-astronomy. pdf, 122K)
  - b. Medical Imaging – Positron Emission Tomography  
(I-2-b-pet.pdf, 2012K)
  - c. X-Ray Fluorescence  
(I-2-c-x-ray.pdf, 119K)
  - d. Vertex Detection in High Energy Physics  
(I-2-d-vertex.pdf, 268K)

II. Functional Components of a Detector System  
(II-Functions.pdf, 20K)

III. Scintillation Detectors  
(III-Scint.pdf, 643K)

IV. Energy Deposition and Spectrum Formation in the Detector  
(IV-E-Deposition, 409K)

V. Semiconductor Detectors – Part I

1. Principles of Semiconductor Detectors  
(V-1-Principles.pdf, 136K)
2. Signal Amplification  
(V-2-Signal.pdf, 72K)

3. Resolution and Signal-to-Noise Ratio  
(V-3-Resolution.pdf, 237K)
4. Pulse Shaping  
(V-4-Shapers.pdf, 257K)
5. Timing Measurements  
(V-5-Timing.pdf, 117K)

VI. Position-Sensitive Detectors  
(VI-PSD.pdf, 223K)

VII. Digitization of Pulse Height  
(VII-Digitization.pdf, 67K)

VIII. Semiconductor Detectors – Part II

1. The Detector Signal  
(VIII-1-Signal.pdf, 797K)
2. A Semiconductor Device Primer
  - a) Doping and Diodes  
(VIII-2-a-diodes.pdf, 269K)
  - b) Imperfections in Crystals  
(VIII-2-b-defects.pdf, 229K)
  - c) Fabrication of Semiconductor Devices  
(VIII-2-c-fab.pdf, 124K)
3. Bipolar Transistors  
(VIII-3-BJT.pdf, 147K)
4. Field Effect Transistors  
(VIII-4-FET.pdf, 360K)
5. Noise in Transistors  
(VIII-5-noise.pdf, 163K)
6. Rate of Noise Pulses in Threshold Discriminator Systems  
(VIII-6-rate.pdf, 33K)
7. Photodiodes  
(VIII-7-photodiodes.pdf, 131K)

IX. Development of a Tracker Concept  
(IX-Tracker.pdf, 746K)

X. Why Things Don't Work  
(X-Work.pdf, 277K)
